

Cyclical dislocation at ~\$100 sets up a contrarian overweight case grounded in cash flows, DCF, and comps

- **Guidance Shock:** Post-cut panic drove LULU to ~\$100 despite a long track record of double-digit revenue growth [1]
- **NOPAT Bridge:** Revenue and margin drivers isolate durable cash generation beneath headline volatility [2]
- **Valuation Stack:** 9.0% WACC base-case DCF anchors \$133.64 target with bear/bull brackets [3]
- **Risk / Reward:** Football field and comps frame asymmetric re-rating vs. downside floor [1][3]

Guidance reset created a cyclical entry; fundamentals remain intact at double-digit margins

- **Post-Cut Trough:** FY26 guidance cut catalyzed a ~50% drawdown to ~\$100/share entry [1]
- **Disproportionate Reaction:** Street penalized a 5–7% revenue guide cut vs. historical double-digit CAGR [2]
- **Cash Flow Durability:** Clean run-rate operating margin holds at **13.2%** post tariff adjustments [3]
- **Positioning:** Setup favors long-duration holders into FY27–FY28 estimate stabilization [1][3]

*Consensus capitulated on guidance; price targets cut sharply
while balance-sheet quality was ignored*

- **Morgan Stanley:** Cut 2026 revenue outlook to **\$10.35B** with a sharply negative post-release stance [1]
- **Consensus PT Reset:** Street target reduced **\$176 → \$136** as cyclical fears dominated the narrative [2]
- **Neutral Holdouts:** BTIG **Neutral** underscores tactical caution, not structural brand impairment [3]
- **Contrarian Window:** Sentiment trough historically precedes multi-quarter estimate stabilization [2][3]

\$133.64 base DCF supports overweight; margins, WACC discipline, and China offset Americas softness

- **Base Case Target:** DCF implies **\$133.64/sh** (+**33.6%** vs. ~\$100) on published assumptions [1]
- **Pillar I — Margin Quality:** **13.2%** clean run-rate EBIT after normalizing tariff refunds [2]
- **Pillar II — Discount Rate:** **9.0% WACC** caps terminal growth at **2.3%** [3]
- **Pillar III — Geo Mix:** **+4%** China Mainland growth offsets near-term North America stagnation [4]

Americas still ~71% of revenue, but China growth provides the offset to domestic comp softness

- **Revenue Scale: \$11.1B** FY25 revenue; Americas **\$7.85B (70.7% of mix)** [1]
- **Americas Pressure:** Comparable sales **-3%** — cyclical macro, not structural brand erosion [2]
- **China Offset:** Mainland China **+20%** to **\$1.75B**, validating international growth engine [3]
- **Model Implication:** FY26–30 build leans on China store adds and comps to bridge Americas drag [3]

Premium DTC mix sustains best-in-class margins and capital efficiency vs. wholesale peers

- **Gross Margin Moat:** 56.6% gross margin — structural premium vs. athletic apparel peers [1]
- **E-Commerce Economics:** DTC e-commerce EBIT margin 23.6% without retail occupancy drag [2]
- **Store Productivity:** \$1,426 sales per sq. ft. at 18.6% store EBIT margin [3]
- **Capital Efficiency:** High-margin, asset-light mix supports FCF conversion through the cycle [1][3]

Fragmented athleisure TAM with premium barriers; scale winners compound ROE through cycles

- **Market Structure:** Global athleisure remains fragmented — few operators earn durable excess returns [1]
- **Premium Barriers:** Brand, DTC scale, and product IP protect leaders from cyclical noise [2]
- **ROE Proof Point:** LULU **30.3% ROE** vs. retail median **6.8%** [3]
- **Implication:** Cyclical drawdowns in premium leaders historically precede estimate recovery [1][3]

Football field: implied share-price ranges by methodology (base case DCF)

12-month target \$140 sits above base-case DCF \$134 and inside the comps/SOTP ranges: a partial re-rating, not a return to peak multiples.

DCF row = Scenarios col G (Gordon growth). Bear \$56 / bull \$202 bracket scenario range from the model.

Geographic segments on FY30E base revenue: EV/EBITDA spreads
vs Gordon-implied exit (7.4x)

Segment	FY30E rev	EBITDA %	FY30E EBITDA	EV/EBITDA	Segment EV (\$M)
Americas	8,070	16.5%	1,551	6.4x–7.1x	9,924–11,010
China Mainland	1,805	19.5%	410	7.9x–9.4x	3,238–3,852
Rest of World	1,543	18.0%	324	7.1x–8.1x	2,297–2,621
Total segment EV	11,418		2,284	6.8x–7.7x	15,459–17,483
Corporate / HQ (no separate carve-out)				n/a	\$0
+ Cash / – lease debt (EV bridge)				n/a	+1,807 / –1,798
Implied equity value / share				n/a	\$139–\$157

Methodology

- Single-brand retailer: geography is the cleanest SOTP cut (Americas / China / RoW per 10-K)
- FY30E segment revenue = FY25 geo mix × base-case consolidated FY30 revenue (Scenarios col G)
- Segment EV/EBITDA spreads anchor to Gordon-implied exit 7.4x (selected DCF TV identity: not the 5–8x comps football-field band)
- Americas: Gordon – 1.0x to – 0.25x (mature); China: +0.5x to +2.0x (growth); RoW: –0.25x to +0.75x
- Consolidated base-case DCF \$134 uses Gordon growth (g=2.25%); SOTP is terminal-year EBITDA triangulation only

SOTP vs DCF

SOTP range: \$139–\$157

Base-case DCF: \$134

Overlap is expected: SOTP applies FY30 EBITDA multiples; DCF discounts explicit FCF + Gordon growth TV.

Base-case unlevered DCF (Scenarios col G): Gordon growth terminal value; 7.4x is implied exit identity

BASE-CASE ASSUMPTIONS (SCENARIOS COL G)

Assumption	Value
FY2026 revenue growth	-6.1%
FY2027–30 revenue growth (avg)	+2.3%
Clean EBIT margin (FY26 run-rate)	13.2%
Terminal EBIT margin (FY2030E)	15.5%

Company	EV/Rev	EV/EBITDA	EV/EBIT	P/E	Metric	Peer med.	LULU base	Implied px
adidas	1.51x	9.2x	18.6x	19.1x				
Nike	1.27x	12.7x	15.9x	18.3x	EV / Revenue	1.63x	\$10,425M	\$119-\$231 (med \$153)
Deckers	2.47x	7.9x	9.8x	12.1x				
Crocs	1.74x	7.8x	7.8x	10.3x	EV / EBITDA	9.4x	\$2,707M	\$190-\$311 (med \$229)
Levi Strauss	1.52x	9.6x	18.1x	15.0x				
Kontoor	2.01x	12.8x	15.4x	18.0x	EV / EBIT	15.7x	\$2,211M	\$155-\$369 (med \$311)
Core median (ex-LULU)	1.63x	9.4x	15.7x	16.5x				
LULU @ \$100 (current)	1.07x	4.7x	5.0x	10.4x	P / E	16.5x	\$9.61	\$99-\$183 (med \$158)

Peer benchmark methodology

Core peer set (NKE, ADS, DECK, CROX, LEVI, KTB) evaluates relative valuation using PitchBook data (04-Sep-2026). Implied equity = peer median × LULU base → EV, then + cash – ASC 842 lease debt ÷ shares.

Implied EV = peer median × LULU base (cols 2–3); P/E = median × EPS (no EV). EV + cash – lease debt ÷ shares = equity/sh.

Multiples confirm severe undervaluation

LULU trades at 1.07x EV/Revenue, 4.7x EV/EBITDA (PitchBook TTM), and 10.4x forward P/E vs core peer medians of 1.63x EV/Revenue, 9.4x EV/EBITDA, and 16.5x P/E.

DCF terminal valuation discount

Base-case DCF uses Gordon growth $g = 2.25\%$, implying 7.4x FY30 EV/EBITDA exit multiple: well below the 9.4x peer median (right table uses TTM EBITDA).

Conservative target price re-rating

Our \$134 base-case DCF and \$140 12-month target (+6 vs DCF, ~4% above model fair value) reflect undervaluation with only a modest re-rating: not Nike-level multiples.

Private-market context for athleisure M&A: not used to imply a control premium on LULU

Target	Year	Type	EV (\$M)	EV/Rev	EV/EBITDA	Status
Sweaty Betty	2021	Closed acquisition	410	1.6x	16.0x	Closed Aug-2021; ~16x FY21E EBITDA
Gymshark	2020	Minority growth round	1,300	5.0x	n/a	Closed Aug-2020; \$1.3bn EV (minority)
Vuori	2021	Growth investment	4,000	n/a	n/a	Closed Oct-2021; \$4bn post-money
Alo Yoga (Color Image)	2023	Unclosed sale process	10,000	5.0x	n/a	Unclosed; no deal per Reuters Jun-2026
LULU (public @ \$100)	n/a	Public equity	11,129	1.07x	4.7x	Trading comps only (not a premium benchmark)

Private precedent framework

Non-Alo private transactions establish a contextual floor of what strategics and PE pay for premium athleisure. They do not imply a control premium on LULU's public stock.

Closed M&A benchmark

Wolverine paid \$410M (~16x EBITDA, ~1.6x sales) for Sweaty Betty (2021), a concrete operating-company precedent for women's DTC activewear.

Growth capital rounds

Gymshark (\$1.3B implied EV, 2020 minority stake) and Vuori (\$4B post-money, 2021) show institutional demand and realistic baselines for premium DTC brands.

Excluded unclosed process

Alo's ~\$10B ask (~5.0x EV/Sales) is LULU's closest yoga peer, but unclosed private asks cannot dictate actual public equity valuation.

Valuation stack

DCF base: \$134 | Target: \$140

Comps median EV/EBITDA 9.4x → ~\$229/sh

Reasonably assumed ceiling from peer EV/EBITDA re-rating. Not our price target.
